Derby ODBC Driver

The Easysoft Derby ODBC Driver is a fast and highly stable ODBC Driver for the Apache Derby relational database.

It was developed specifically to produce the most efficient and performance-oriented driver for Derby installations; and with its simple install process it reduces the cost and time of deploying and maintaining your ODBC applications.

The benefits of our Derby ODBC Driver

The Easysoft Derby ODBC Driver delivers the same great benefits that the Apache Derby Project delivers in that the Driver is simple to install, is fully standards based and secure.

In our ODBC Driver for Derby we have developed the best in class and best connectivity for the Derby database, always ensuring high-end client performance and scalability for applications connecting to Derby.

Excellent Database, Platform and Application Coverage

We provide you with Read/Write access, so not only are you able to Read your MS Access files, you are also able to Write to the files also, ensuring that if needed you can work on your data on Linux and Unix then easily Write it back to the database.

The Driver also supports a wide range of popular business applications including MS Office, OpenOffice.org and StarOffice etc.

Distributed Relational Database Architecture

This Easysoft ODBC Driver for Derby uses the Distributed Relational Database Architecture (DRDA) data transfer protocol to communicate with the Derby Network Server, this enables local and remote ODBC applications to access Derby databases. The Easysoft ODBC-Derby Driver does not use the Derby JDBC Driver.
